REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: The claims define an apparatus for trimming comprising a support block with a tool holder that is capable of holding a cutting tool that is linearly biased and rotationally biased to a centered position wherein the support block is linearly movable relative to a housing. Kozyrski (5,845,554) teaches a tool holder that is rotatable relative to the support block, but does not teach a first and second biasing means biasing elements to a centered position. Mori (5,931,071) teaches a tool holder that is rotationally biased to a centered position, but does not teach a support block movable relative to the housing along a linear axis. Holmstrom (4,312,255) teaches a biasing assembly rotationally biasing the tool holder to a centered position, but does not teach a second biasing assembly centering the tool holder along a linear axis. Simon et al (4,976,412) teaches a tool holder biased to a centered position linearly and rotationally, but does not teach a trimming assembly for trimming and does not teach a tool holder capable of holding a cutting tool. It would not have been obvious to combine the references with other prior art teaching in order to meet the claim limitations. On page 6 of the response filed 03/03/06, second paragraph, applicant states that Claim 1 is consistent with allowed Claim 10, and therefore the device of Claim 1 is inferred to be a trimming assembly. The phrase "device for trimming" infers a trimming tool, and any device that has no trimming tool would not be infringing.

.Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
